

Did You Know?

Every year, the Fraser River deposits about 32 million m³ of sediment into the Strait of Georgia and about 3.5 million m³ is dredged from the deep-sea channel to ensure safe passage for ocean-going vessels.

Join us for this free presentation to learn:

- The uniqueness of the Fraser River freshet
- When, where and how maintenance dredging occurs
- The challenges of dredging the deep-sea channel

You're Invited!

Thursday, June 15, 2017
